

Seal Enclosure: Militaire 4.3-10 Slim Version

Silicone Seal Enclosure **Militaire Connector 4.3-10 Slim** Version is a unique enclosure designed to seal connectors 4.3-10.

The product is designed to eliminate deficiencies that observed in similar Gel closures products runs on the market (polymerization from sun, water ingress, etc) using Silicone Rubbers for sealing instead of Gel. On top eliminate maintenance problems that phased with products like Cold Shrinks tubes which is not reusable in case of maintenance needs (VSWR, PIM, Radio upgrades etc.)

Benefits:

- ✓ Stable characteristics of the product over time and non-polymerization due to the use of an inner silicone patch instead of Gel.
- ✓ Stable characteristics and resistance to High Radiation, Humidity, Water, Salts, Dust, Industrial & Biochemical pollutants.
- ✓ Minimum maintenance costs, reusage of the product without changing its original characteristics.
- ✓ Minimum maintenance cost and flexibility just replacing the inner silicone rubbers in case of need.
- ✓ Possibility of Ordering parts for the Seal closure per customer needs.
- ✓ Eliminate on site sealing problems for connectors 4.3-10 due to lack of materials.

- * Patented Product
- * Product designed – manufactured by Telcolead LTD
- * Manufacturing standards ISO 9001

4.3-10 Slim Version

- Patent Design Certificate : GR1009553B GR20180100356A
- Patent Design Certificate : WO2020025985A1, GR2019000048W

Product Warranty: 2 Years
